Format for Papers and Presentations

Speakers should plan on a 15 to 20 minute presentation focusing on the impact of computing in an academic setting. Time constraints are rigid. Classrooms have PC laptops with Internet connections, and data and overhead projectors. To facilitate technical transitions between presentations, speakers should bring their presentation on a disk for MSU technical staff to load onto the MSU laptop. An area for extended demonstrations of computer programs, simulations, on-line accessing of databases and/or mainframes is available during breaks. All CCSCE03 papers are blind refereed by three referees. Accepted papers as well as panel and workshop abstracts are published in the *Journal of Computing Sciences in Colleges.*
