NB: Paying attention in class is a must, so to facilitate this need; the instructor prepared these points as a loose outline. You should still write notes in class or from handouts (if any). You should also take notes of some things the instructor says in class but not stated here.

**Points that were explained and/or written in class**

1. What a computer means to you (technical definition).
2. Definition of some basic terms & acronyms in Information Technology e.g WWW, Internet, Gateway, Hardware, Software, Networks, Uploading etc.
