Careers: Entry Level Position/1-2 years
Environmental Technician Job Opportunity

Reference # 2004-157

Jacques Whitford is one of Canada and the US’s fastest growing multi-disciplinary firms of consulting engineers and environmental scientists. Established in 1972, we are an employee-owned firm with over 1000 staff in offices throughout Canada, the Eastern USA and internationally. We have an immediate opening for an Environmental Scientist/Geologist in our Elmsford, New York office.

We are seeking individuals with 1-2 years experience in environmental consulting as an environmental technician/scientist and who have completed a college or university program in one of the following disciplines: Geology, chemistry, environmental technology, and/or environmental science. Experience with subsurface investigation methods and sampling techniques is essential. Candidate should have current OSHA 40-hour HAZWOPER training certification.

Ideal candidates will have experience with and demonstrate knowledge of the following:
- Environmental consulting field
- Fieldwork and sample collection procedures (preferably with NJDEP and/or NYSDEC)
- Industrial hygiene sampling procedures
- Field experience associated with electrical substation and/or MGP sites
- Data tabulation/reduction, report preparation, and basic computer skills

Jacques Whitford offers challenging and rewarding technical work. Additional benefits for proven performance include a merit-based reward system and eligibility for ownership. If you are interested in this exciting opportunity, please forward your resume and salary expectations quoting Reference #2004-157 to:
